

THIS IS A TRUE STORY.

The events depicted in this film
took place in Minnesota in 1987.

At the request of the survivors,
the names have been changed.

Out of respect for the dead,
the rest has been told exactly
as it occurred.

Easier debugging?

CERTIFIED

USB OTG

TM

ON-THE-GO

adbd

<https://github.com/hadess/adbd/commits/master>

Debug hangs
and other bugs
through a simple
"adb shell"

Support for booting a 64-bit OS
EFI_MIXED

grub/shim for secure boot support,
lorax, anaconda

xdg-app

```
adb install org.gnome.Videos.app
```

I know people.

Hey Larry!

I'm good at reading (Googling) mailing-lists

Hey non-upstreamed patches!

Windows 8 doesn't support OTG

THANK YOU FOR TRYING WINZIP!

This is a fully functional unregistered version for evaluation use only.
The registered version does not display this notice.

You can order the registered version online, by phone, or by mail.
Immediate online delivery is available from www.winzip.com.

The image shows two Belkin USB cables against a white background. One cable is positioned diagonally from the top right towards the center, featuring a black oval-shaped connector with the 'BELKIN' logo and a green LED indicator. The other cable is positioned diagonally from the bottom left towards the center, featuring a standard black USB-A connector. A semi-transparent dark grey rectangular box is centered over the image, containing the text 'Other data cables' in white.

Other data cables

EFI_MIXED doesn't work, yet

You can boot through the legacy 64-bit entry point

No xdg-app patch yet
No Builder integration yet

No refunds
